

Solutions for Sustainable Tourism

Project Partners:

PANDION WILD TOURS - Bulgaria (Petar Dilchev)

“BIRDING THE STRAIT” BIRDING IN SPAIN AND MOROCCO – Spain

SOFIA TECH LTD - Bulgaria

Who we are?

Pandion Wild Tours Ltd is the first and the leading Bulgarian company in the field of Eco & Sustainable tourism. We started our activities in 1990

Pandion Wild Tours Ltd has specialized in the field of *wildlife, nature* and *historical tourism*. We offer a great diversity of wildlife and nature holidays & tours in Europe's richest region in terms of biodiversity: Bulgaria

We cater to tourists with diverse interests: birders, botanists, and those interested in butterflies, dragonflies, spiders, reptiles and amphibians, mammals, wildlife photography and nature in general.

Our needs?

- Sustainable tourism can be defined as a kind of tourism that has more benefits than negative impacts, especially relating to the environment, the economy and communities. Truly sustainable and responsible tourism should make destinations better for people to live in as well as visit.
- Nature cannot be guaranteed and is constantly changing, which makes organising of the tours a long communication process of exchanging information between companies and clients.
- Lack of staff. During the active season all our members with specialized knowledge are traveling and is difficult to answer on time on all new requests.
- Organising a Nature Tour requires a lot more individual approaches and solutions

Birdwatching in Srebarna Nature Reserve

Our Solution:

- **Multi Module Tab for building your own nature tour**
 - Providing all the necessary information to the clients and the operator without exchanging e-mails
 - Significantly reduces communication time
 - Automation of the booking process that does not require additional staff
 - Providing the project concept functionalities to all interested sides
